The Company uses certain financial measures that are not recognized under generally accepted accounting principles in the United States (“GAAP”) in evaluating its business. One of the key limitations of using non-GAAP financial measures is that they do not reflect all items of income and expense that affect the Company’s operations. Further, the non-GAAP measures may differ from the non-GAAP measures used by other companies, including peer companies, and therefore their comparability may be limited. The use of such non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. For a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP measures, see Reconciliations of GAAP and non-GAAP Financial Measures.
