Services revenue was RMB782.6 million (US\$120.3 million), an increase of 56.0% from RMB501.5 million in the same quarter of last year. Use of Non-GAAP Financial Measures

In evaluating the Company's business, the Company considers and uses non-GAAP net income/(loss) from operations, non-GAAP operating margin, non-GAAP net income/(loss), non-GAAP net margin, non-GAAP net income (loss) attributable to Baozun ordinary shareholders and non-GAAP net income (loss) attributable to Baozun ordinary shareholders per ADS, as supplemental measures to review and assess the Company's operating performance. The presentation of these non-GAAP financial measures is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. Non-GAAP net income/(loss) from operations is net income/(loss) from operations excluding share-based compensation expenses and amortization of intangible assets resulting from business acquisition. Non-GAAP operating margin is non-GAAP income from operations as a percentage of total net revenues. Non-GAAP net income/(loss) is net income/(loss) excluding share-based compensation expenses and amortization of intangible assets resulting from business acquisition. Non-GAAP net margin is non-GAAP net income as a percentage of total net revenues. Non-GAAP net income (loss) attributable to Baozun ordinary shareholders is net income (loss) attributable to Baozun ordinary shareholders excluding share-based compensation expenses and amortization of intangible assets resulting from business acquisition. Non-GAAP net income (loss) attributable to Baozun ordinary shareholders per ADS is non-GAAP net income (loss) attributable to Baozun ordinary shareholders divided by weighted average number of shares used in calculating net income per ordinary share multiplied by three.

The Company presents the non-GAAP financial measures because they are used by the Company's management to evaluate the Company's operating performance and formulate business plans. Non-GAAP income/(loss) from operations and non-GAAP net income/(loss) enable the Company's management to assess the Company's operating results without considering the impact of share-based compensation expenses and amortization of intangible assets resulting from business acquisition. The Company also believes that the use of the non-GAAP measures facilitate investors' assessment of the Company's operating performance.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using non-GAAP income/(loss) from operations and non-GAAP net income/(loss) is that they do not reflect all items of income and expense that affect the Company's operations. Share-based compensation expenses and amortization of intangible assets resulting from business acquisition have been and may continue to be incurred in the Company's business and is not reflected in the presentation of non-GAAP income/(loss) from operations and non-GAAP net income/(loss). Further, the non-GAAP measures may differ from the non-GAAP measures used by other companies, including peer companies, and therefore their comparability may be limited. In light of the foregoing limitations, the non-GAAP net income/(loss) from operations, non-GAAP operating margin, non-GAAP net income/(loss), non-GAAP net margin, non-GAAP net income (loss) attributable to Baozun ordinary shareholders and non-GAAP net income (loss) attributable to Baozun ordinary shareholders per ADS for the period should not be considered in isolation from or as an alternative to net income/(loss) from operations, operating margin, net income/(loss), net margin, net income (loss) attributable to Baozun ordinary shareholders and net income (loss) attributable to Baozun ordinary shareholders per ADS, or other financial measures prepared in accordance with U.S. GAAP.

The Company compensates for these limitations by reconciling the non-GAAP financial measures to the nearest U.S. GAAP performance measures, which should be considered when evaluating the Company's performance. For reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures, please see the section of the accompanying tables titled, "Reconciliations of GAAP and Non-GAAP Results."
