¹ This announcement contains translations of certain Renminbi (RMB) amounts into U.S. dollars (US\$) at a specified rate solely for the convenience of the reader. Unless otherwise noted, the translation of RMB into US\$ has been made at RMB6.6981 to US\$1.00, the noon buying rate in effect on June 30, 2022 as set forth in the H.10 Statistical Release of the Federal Reserve Board.

² Non-GAAP income (loss) from operations is a non-GAAP financial measure, which is defined as income (loss) from operations excluding share-based compensation expenses and amortization of intangible assets resulting from business acquisition.

³ Non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. is a non-GAAP financial measure, which is defined as net income (loss) attributable to ordinary shareholders of Baozun Inc. excluding share-based compensation expenses, amortization of intangible assets resulting from business acquisition and unrealized investment loss.

⁴ Each ADS represents three Class A ordinary shares.

⁵ Basic and diluted non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. per ADS are non-GAAP financial measures, which are defined as non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. divided by weighted average number of shares used in calculating basic and diluted net income (loss) per ordinary share multiplied by three, respectively.

as of June 30, 2022.

Second Quarter 2022 Operational Highlights

- Total Gross Merchandise Volume (“GMV”)⁶ was RMB23,086.4 million, an increase of 46.8% year-over-year.
- Distribution GMV⁷ was RMB778.5 million, a decrease of 28.8% year-over-year.
- Non-distribution GMV⁸ was RMB22,307.9 million, an increase of 52.4% year-over-year, of which, consignment model GMV was RMB5,121.4 million, a decrease of 0.2%, and service fee model GMV was RMB17,186.5 million, an increase of 80.9% year-over-year, driven by strong volume in the electronics category.
- GMV generated from non-TMALL marketplaces and channels accounted for approximately 24.4% of total GMV during the quarter, compared with 31.7% for the same period of 2021.
- Number of brand partners for store operations increased to 355 as of June 30, 2022, from 345 as of March 31, 2022.

Mr. Vincent Qiu, Chairman and Chief Executive Officer of Baozun, commented, “In the face of the most challenging quarter due to the strict COVID-19 lockdown in April and May 2022 in many key cities in China, our second quarter financial results remained solid. Our advanced technologies and infrastructures powered us through the tough conditions, and in particular, our evolution in digital transformation, strategic business development, and omni-channel expansion further enhanced our business adaptability.”

“In light of ongoing macro uncertainties, we implement our business strategy with discipline, focusing on utilizing our broad and deep experience in e-commerce to expand value-added services and long-term brand partnerships, while strategically investing in business transformation to expand our total addressable market. We have made meaningful progress in these new initiatives, and we anticipate fully unlocking their incremental growth potential in the near future.” Mr. Qiu concluded.

Mr. Arthur Yu, Chief Financial Officer of Baozun, commented, “Our ability to conduct prevailing business during a strict lockdown highlights the sustainability of our business diversification and resiliency. We continue to prioritize resource allocation and cost optimization to further drive working capital efficiency and high-quality growth. Amid the macro challenges, we sustained a healthy level of operating cash flows and reduced long-term debt. With our solid balance sheet and transformative business initiatives, we are confident in our ability to achieve sustainable growth.”

⁶ GMV includes value added tax and excludes (i) shipping charges, (ii) surcharges and other taxes, (iii) value of the goods that are returned and (iv) deposits for purchases that have not been settled.

⁷ Distribution GMV refers to the GMV under the distribution business model.

⁸ Non-distribution GMV refers to the GMV under the service fee business model and the consignment business model.

Second Quarter 2022 Financial Results

Total net revenues were RMB2,122.0 million (US\$316.8 million), a decrease of 7.9% from RMB2,304.1 million in the same quarter of last year. The decrease in total net revenue was mainly due to a reduction in revenue from online store operations, as a result of the strict lockdown due to COVID-19 in April and May across certain areas of China, as well as, a reduction in product sales revenue that was largely offset by an increase in value-added services revenue.

The following table sets forth a breakdown of our revenues by segment and key categories⁹ for the periods indicated:

	For the three months ended June 30,					
	2021		2022		YoY Change	
	RMB	% of Revenue	RMB	US\$		% of Revenue

Product sales revenue was RMB693.9 million (US\$103.6 million), a decrease of 28.6% from RMB972.1 million in the same quarter of last year. The decrease was primarily attributable to the Company's optimization of its product portfolio in distribution model, and weaker macro environment and a decline in consumption sentiment in China during the quarter, resulting in sales contraction in electronics and appliances categories under distribution model.

Services revenue was RMB1,428.1 million (US\$213.2 million), an increase of 7.2% from RMB1,332.0 million in the same quarter of last year. The increase was primarily attributable to increasing revenue contribution from warehousing and fulfillment services.

Total operating expenses were RMB2,145.4 million (US\$320.3 million), compared with RMB2,197.5 million in the same quarter of last year.

⁹ Key categories refer to the categories that accounted for more than 5% of the Company's total net revenues during the second quarter of 2022.

- **Cost of products** was RMB602.2 million (US\$89.9 million), compared with RMB814.6 million in the same quarter of last year. The decrease was primarily due to the decline in product sales revenue.
- **Fulfillment expenses** were RMB725.0 million (US\$108.2 million), compared with RMB560.4 million in the same quarter of last year. The increase was primarily due to the fulfillment cost of RMB180.5 million (US\$27.0 million) correlated to higher revenue from warehousing and fulfillment services in the second quarter of 2022, which was partially offset by efficiency improvements of fulfillment, and savings in customer services as the Company implementing its regional service centers initiative.
- **Sales and marketing expenses** were RMB668.3 million (US\$99.8 million), compared with RMB648.2 million in the same quarter of last year. The increase was mainly due to increased strategic business development staff to drive business growth, which was partially offset by efficiency improvements.
- **Technology and content expenses** were RMB112.2 million (US\$16.8 million) compared with RMB115.4 million in the same quarter of last year. The decrease was mainly due to the Company's cost control initiatives and efficiency improvements, which was partially offset by the Company's ongoing investment in technological innovation and productization.
- **General and administrative expenses** were RMB91.7 million (US\$13.7 million), compared with RMB98.0 million in the same quarter of last year. The decrease was primarily due to the higher expenses in the same quarter of last year when the Company moved into its new headquarters but still incurred certain costs for the old headquarter during the transition period, as well as the Company's cost control initiatives and efficiency improvements in this quarter.

Loss from operations was RMB23.4 million (US\$3.5 million), compared with income from operations of RMB106.6 million in the same quarter of last year. Operating margin was negative 1.1%, compared with 4.6% in the same quarter of last year.

Non-GAAP income from operations was RMB47.3 million (US\$7.1 million), compared with RMB161.6 million in the same quarter of last year. Non-GAAP operating margin was 2.2%, compared with 7.0% in the same quarter of last year.

Unrealized investment loss was RMB12.7 million (US\$1.9 million), compared with RMB17.3 million in the same quarter of last year. The unrealized investment loss was mainly related to a decrease in the trading price of iClick Interactive Asia Group Limited, or iClick Interactive, a public company listed on the Nasdaq Global Market that the Company invested in January 2021.

Exchange loss was RMB29.0 million (US\$4.3 million), due to exchange rate fluctuation between Renminbi and U.S. dollar in the quarter ended June 30, 2022, compared to net exchange gains of RMB24.7 million in the same quarter last year.

Net loss attributable to ordinary shareholders of Baozun Inc. was RMB77.8 million (US\$11.6 million), compared with net income attributable to ordinary shareholders of Baozun Inc. of RMB79.8 million in the same quarter of last year.

Basic and diluted net loss attributable to ordinary shareholders of Baozun Inc. per ADS were both RMB1.26 (US\$0.19), compared with basic and diluted net income attributable to ordinary shareholders of Baozun Inc. of RMB1.08 and RMB1.06, respectively, for the same period of 2021.

Non-GAAP net income attributable to ordinary shareholders of Baozun Inc. was RMB1.3 million (US\$0.2 million), compared with RMB150.8 million in the same quarter of last year.

Basic and diluted non-GAAP net income attributable to ordinary shareholders of Baozun Inc. per ADS were both RMB0.02 (US\$0.00), compared with RMB2.04 and RMB2.01, respectively, for the same period of 2021.

As of June 30, 2022, the Company had RMB3,136.8 million (US\$468.3 million) in **cash, cash equivalents, and restricted cash**, compared with RMB4,699.8 million as of December 31, 2021. The decrease in cash position was mainly due to the Company's repurchase of its 1.625% convertible senior notes due 2024 and share repurchase activities during the first half of 2022.

Update in Share Repurchase Programs

During the second quarter of 2022, the Company repurchased approximately 5.0 million of ADSs for approximately US\$42.0 million under its share repurchase program.

Use of Non-GAAP Financial Measures

The Company also uses certain non-GAAP financial measures in evaluating its business. For example, the Company uses non-GAAP income (loss) from operations, non-GAAP operating

margin, non-GAAP net income (loss), non-GAAP net margin, non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. and non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. per ADS, as supplemental measures to review and assess its financial and operating performance. The presentation of these non-GAAP financial measures is not intended to be considered in isolation, or as a substitute for the financial information prepared and presented in accordance with U.S. GAAP. Non-GAAP income (loss) from operations is income (loss) from operations excluding the impact of share-based compensation expenses and amortization of intangible assets resulting from business acquisition. Non-GAAP operating margin is non-GAAP income (loss) from operations as a percentage of total net revenues. Non-GAAP net income (loss) is net income (loss) excluding the impact of share-based compensation expenses and amortization of intangible assets resulting from business acquisition and unrealized investment loss. Non-GAAP net margin is non-GAAP net income (loss) as a percentage of total net revenues. Non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. is net income (loss) attributable to ordinary shareholders of Baozun Inc. excluding the impact of share-based compensation expenses and amortization of intangible assets resulting from business acquisition and unrealized investment loss. Non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. per ADS is non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. divided by weighted average number of shares used in calculating net income (loss) per ordinary share multiplied by three.

The Company presents the non-GAAP financial measures because they are used by the Company's management to evaluate the Company's financial and operating performance and formulate business plans. Non-GAAP income (loss) from operations enables the Company's management to assess the Company's financial and operating results without considering the impact of share-based compensation expenses and amortization of intangible assets resulting from business acquisition. Non-GAAP net income (loss) enables the Company's management to assess the Company's financial and operating results without considering the impact of share-based compensation expenses and amortization of intangible assets resulting from business acquisition and unrealized investment loss. Such items are non-cash expenses that are not directly related to the Company's business operations. Share-based compensation expenses represent non-cash expenses associated with share options and restricted share units the Company grants under the share incentive plans. Amortization of intangible assets resulting from business acquisition represents non-cash expenses associated with intangible assets acquired through one-off business acquisition. Unrealized investment loss represents non-cash expenses associated with the change in fair value of the equity investment. The Company also believes that the use of the non-GAAP measures facilitates investors' assessment of the Company's financial and operating performance.

The non-GAAP financial measures are not defined under U.S. GAAP and are not presented in accordance with U.S. GAAP. The non-GAAP financial measures have limitations as analytical tools. One of the key limitations of using non-GAAP income (loss) from operations, non-GAAP net income (loss), non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc., and non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. per ADS is that they do not reflect all items of income and expense that affect the Company's operations. Share-based compensation expenses and amortization of intangible assets resulting from business acquisition and unrealized investment loss have been and may continue to be incurred in the Company's business and is not reflected in the presentation of non-GAAP income

(loss) from operations and non-GAAP net income (loss). Further, the non-GAAP measures may differ from the non-GAAP measures used by other companies, including peer companies, potentially limiting the comparability of their financial results to the Company's. In light of the foregoing limitations, the non-GAAP income (loss) from operations, non-GAAP operating margin, non-GAAP net income (loss), non-GAAP net margin, non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. and non-GAAP net income (loss) attributable to ordinary shareholders of Baozun Inc. per ADS for the period should not be considered in isolation from or as an alternative to income (loss) from operations, operating margin, net income (loss), net margin, net income (loss) attributable to ordinary shareholders of Baozun Inc. and net income (loss) attributable to ordinary shareholders of Baozun Inc. per ADS, or other financial measures prepared in accordance with U.S. GAAP.

The Company compensates for these limitations by reconciling the non-GAAP financial measures to the nearest U.S. GAAP performance measures, which should be considered when evaluating the Company's performance. For reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures, please see the section of the accompanying tables titled, "Reconciliations of GAAP and Non-GAAP Results."
